How to include the talque plugin in your website

You need to include the following items on your website

1. the talque plugin script
2. the talque stylesheet (css)
3. a HTML DIV where you actually want to display the plugin content

You need to include the orgId of your event and the view ID, where the display settings are saved. For one event you can have several view IDs, e.g., if you want to display the agenda on your web site in a specific style and on a stele in the venue in another style, you can do this by using multiple view IDs.

```
<style>
  body {max-width: 1200px; margin: 70px auto 70px auto;}
  p, div, h1, h2{text-align: center;font-family: Arial, Helvetica, sans-serif}
</style>
<html>
  <meta charset="UTF-8">
  <head>
    <meta name="viewport" content="width=device-width, initial-scale=1">
    <link rel="stylesheet"
href="https://storage.googleapis.com/assets.talque.com/plugin/view/jCj6cIaWNRerE6pZ4hn8/app.css"
  />
  </head>

  <body>
    <script async defer type="text/javascript"
src="https://storage.googleapis.com/assets.talque.com/plugin/view/jCj6cIaWNRerE6pZ4hn8/app.js">
    </script>
    <div class="tq-talque-view"
      org-id="jCj6cIaWNRerE6pZ4hn8"
      view-id="6DwN0E1Lrf7OmdwWyPPD"
      initial ="lecture-list">
    </div>
  </body>
</html>
```

The following view types are currently available:

- **lecture-list** - list of the sessions
- **speaker-grid** - speakers with photos in a 2-d grid.
- **speaker-list** - speakers as list
- **sponsor-grid** - your sponsor logos in a 2-d layout
- **exhibitor-grid** - your exhibitor logos in a 2-d layout

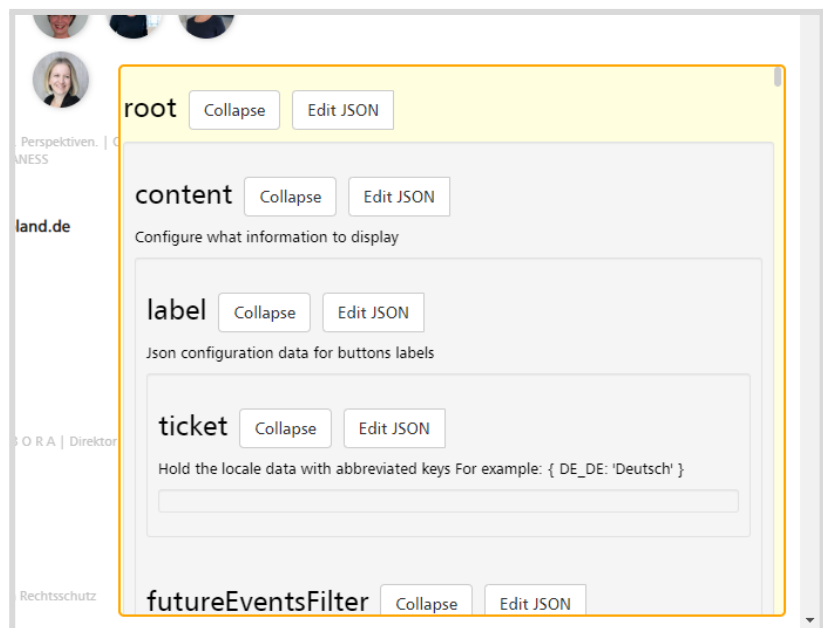

How to open the design editor

1. Open your event website where you integrated the talque website plugin (or alternatively the local sample html file we provided)
2. Open the developer console (Win: Ctrl+Shift+J)
3. Type in `edit()` and press enter

Using `edit()` without a password allows you to try out changes temporarily. They will disappear when you reload the webpage. For permanent changes use the `edit` command with the password be provide for your event, e.g. `edit("123456")`

The talque design editor will open as a small box in the bottom right corner of the website

- The design editor settings are saved per **talque view ID**. For one event you can have several view IDs, e.g., if you want to display the agenda on your web site in a specific style and on a stele in the venue in another style.

talque 

How to Format the Schedule

How to Format the Schedule

The talque schedule is used to show the program or agenda of your event. It is also referred to as session list or lecture list.

Agenda Content: What session details are shown

Show speaker photos

Options: all (speakers and moderators), speakers, none

`content > lectureList > speakerPhotoFilter`

Show format tags

`content > lectureList > formatTags`

Show topics

`content > lectureList > formatTags`

11:00 | **Klimarisiken in der Ernährungsbranche - Messbarkeit und**
11:45 | **Auswirkungen aus Bankenperspektive** Forum BIOFACH

Klima
Katrín Heuzard la Couture GLS Bank | Firmenkundenberaterin/Branchenleiterin Ernährung,
Florian Roth GLS Bank | Referent Wirkungstransparenz & Nachhaltigkeit
Raum Oslo (NCC Ost)

Agenda Content: Which sessions are shown

You can decide that only a part of the agenda is shown. E.g. if you host a congress and a trade show simultaneously from one talque event, you can show on one page only the congress sessions, on another page the trade fair sessions.

Agenda content can be filter in two ways: either in the html-tag that you use to show the agenda on your webpage or in the design editor

Filter Sessions with HTML-tag

To filter displayed sessions in the HTML-tag use on of the parameters

- require-tags for filter button tags
- require-formats for session formats
- require-topics for session topics

and the corresponding [three letter shortcodes](#)

```
<div
  class="tq-talque-view"
  org-id="VDYRv7v7oaA2s432rwMg"
  view-id="IoKwbA39MxcntEocizXB"
  initial="lecture-list"
  require-tags="def,hij">
</div>
```

More information about integration of the plugin and filters can be found in our [technical knowledge base](#).

Filter Sessions with the design editor

Filter sessions by format

content > lectureFilter > formats > required

Click [Add item]. Enter a [three letter format shortcode](#).

Filter sessions by filter button tag

content > lectureFilter > tags > required

Filter sessions by topic

content > lectureFilter > topics > required

required

Only ever show lectures with these formats

 This will affect all agenda blocks using this view ID.

Agenda Filters in the UI

This is a complete example of available filters:

Filters are only shown, when there are sessions which use at least two tags associated with this filter type.

Day Filters

Type: Buttons or Tabs

Hide day filter

```
content > lectureFilter > days > dayFilterUI: BUTTONS, TABS, HIDDEN
```

Show button/tab [All]

```
content > lectureFilter > days > allowMultiDay 
```

Format Filter

Type: Buttons or Dropdown

Hide format filter

```
content > lectureFilter > formats > formatFilterUI: DROPDOWN, BUTTONS, HIDDEN
```

Rename the label

```
content > lectureFilter > formats > label
```

Click on [edit JSON] and enter the label text in all event languages like this:

```
{
  "DE_DE": "Neuigkeit",
  "EN_US": "Novelty"
}
```

Show only some filter options

content > lectureFilter > formats > selectable

Use cases:

- This can be used together with the type 'Button' to highlight certain topics

- It can also be used together with content filtering

Switch the type from *null* to *array*, then click [Add item]. Enter a [three letter format shortcode](#).

At least two format shortcodes need to be entered in the array for the buttons to become visible.

A screenshot of a configuration interface for a 'selectable' filter. At the top, it says 'selectable' followed by a dropdown menu set to 'array'. Below this is a 'Collapse' button. Underneath, it says 'Formats that are selectable in the filter UI, null=all'. There is a list item labeled 'item 1' which contains a text input field with 'oak' typed in. Below the input field are two buttons: 'Delete item' and 'Move down'.

Other Filters

Hide Room dropdown

content > lectureFilter > hideRoom

Hide Search bar

content > lectureFilter > hideTitle

Hide Language dropdown ????

Language dropdown is only shown if ...???

content > lectureFilter > hideLanguage

Experience the World of VEGAN

BIOFACH

✉ eventteam@biofach.de
 ☎ +49.911.8606-8996
 🌐 <https://www.biofach.de>
 Hall: 4A
 Booth: 4A-100

In 2023, the special show Experience the World of VEGAN will be launched with new partners, AöL and VegOrganic. In view of the great, further growing importance of organic, plant-based, vegan foods, we are pleased to be able to collaborate with two partners with a clear and exclusive focus on organic foods and the associated expertise for BIOFACH in AöL and VegOrganic!

Schedule

February 14, 2023

<p>10:30 11:15</p>	<p>Current case law on the labelling and advertising of vegan foods Experience the world of VEGAN</p>	
	<p>Lucia Scharl WBS LEGAL Attorney for intellectual property rights, Mirjam Grieb WBS LEGAL Fachanwältin für gewerblichen Rechtsschutz</p>	
	<p>Experience the world of VEGAN Halle 4A Stand 4A-100</p>

**How to Format the Partner and
Products Lists**

How to Format the Sponsor and Exhibitor Grid and Overlay

Paged View

content > vendorFilter > exhibitorsPerPage, sponsorsPerPage

By default, the full list of exhibitors is shown. For large exhibitor lists, you can use a page view instead.

Show search box

content > vendorFilter > hideName

Hides the searchbox, if checked.

Alignment

Align title

display > vendorGrid > hideName

Hides the searchbox, if checked.

Aligning grid

display > vendorGrid > align: LEFT

Hides the searchbox, if checked.

How to Format the Product List and Overlay

Title font size in the product list and overlay

display > typography > title > size

Set the title to *string* and enter a font size in e.g. *rem, pt, px* or *%*.

You may also want to adapt the *line height*.

title Collapse Edit JSON

cssClass null ▾

family null ▾

lineHeight number ▾

1

size string ▾

3rem

weight string ▾

500

display > typography > title > css

You can also style the title with predefined css classes from the Tailwind css framework (with a prefix "tq-"), e.g. *tq-text-3xl*.

Attention: Currently the tailwind classes are only applied to the overlay title, not the titles in the product list.

For more information visit <https://tailwindcss.com/docs/font-size>

title Collapse Edit JSON

cssClass string ▾

tq-text-2xl, tq-text-indigo-600

Appendices

Appendix 1: Shortcodes

For some filter settings talque three letter shortcodes need to be used. You can obtain these shortcodes using the following steps

4. Open your event in the talque webapp in Chrome
5. Open the developer console (Win: Ctrl+Shift+J)
6. Type one of the variable names like `data.org.fomatLabels` and press enter

```
> data.org.fomatLabels
```

```
< ▶ {onk: 'cook + talk Treff für Profiköche', wse: 'Forum Nachhaltigkeit', obk:
```

7. Click the expand button [▶] to expand the result

```
> data.org.fomatLabels
```

```
< ▼ {onk: 'cook + talk Treff für Profiköche', wse: 'F
```

```
  axo: "Erlebnisswelt VEGAN"
```

```
  del: "Forum Fachhandel"
```

```
  fgk: "Meeting Point BIOimSEH "
```

```
  gcz: "Rundgänge"
```

Shortcode variables

Format	<code>data.org.fomatLabels</code>
